

## QMS POLICY

# DTS DIAGNOSTIC AND TECHNICAL SERVICES PTY LTD

### Version History

Version Number	Description
6.0	Change to document Style and Authorizing Signature
2.1	Initial Implementation of ISO45001 Standard

DTS Diagnostic and Technical Services is a recognised quality provider of Mechatronic Diagnostic, Repairs, Maintenance, and Engineering Services across a diverse range of industries throughout Australia and New Zealand. DTS Diagnostic and Technical Services is known for its professionalism, quality, quick response, and ease of doing business.

To support our vision, the policy is to maintain a comprehensive and practical Quality Management System based on AS/NZS ISO 9001:2015. This will be integral to the provisioning of our Services, Commitment to customer satisfaction and continuous improvement as a Company.

Current Objectives of the QMS will be communicated to staff on a regular basis and progression will be measured and reported.

The Satisfaction of customers, internal and external, will be the primary focus of the quality management system. Customer requirements will be measured and controlled through accurate measurement and implementation of procedures to continually improve our quality management system.

Staff are encouraged to contribute and participate in quality improvement activities and are given an individual responsibility to understand and apply the Quality Management Policy during the performance of their duties.

DTS Management is committed to the Quality Policy through the provisioning of resources and active participation in improving the quality of the services provided.

A handwritten signature in black ink, appearing to read 'Terry Patterson'.
